

DID YOU KNOW

- Most Albertans believe that they use 100 litres of water per day, but in reality the average usage is 329 litres.
- A top loading washing machine uses 122 litres/load, while an efficient front load model uses only 49 litres/load.
- If you change a 20 litre toilet to a 6 litre toilet, you will save approximately 200 litres of water per day and approximately 81,000 litres per year!

WATER CONSERVATION REBATE PROGRAM

is brought to you by the City of Brooks' Environmental Advisory Committee, EcoBrooks.

WATER CONSERVATION REBATE PROGRAM

ARE YOU FLUSHING MONEY DOWN THE DRAIN?

Using less water per flush, laundry cycle or dishwasher load will save you money and conserve water.

One of the easiest ways to reduce the amount of water you use is to replace water fixtures and appliances with low flow models.

Your old toilet, washing machine or dishwasher could save you money through EcoBrooks' Water Conservation Rebate Program.

THE REBATE PROGRAM

Earn a \$50 rebate for each toilet, washing machine or dishwasher replaced with a new ultra low flow/high efficiency model.

The rebate (maximum of three rebates per residential dwelling) will be applied to a City of Brooks utility account and is therefore only offered to City of Brooks residents.

In order to receive a rebate, residents must purchase the fixture at a **local retailer** and present the **original receipt** (no more than one year old) to City Hall.

The following appliances/fixtures are eligible for a rebate:

- 1) Toilets that use 6 litres per flush or less
- 2) Washing machines that use 49 litres per load or less
- 3) Dishwashers that use 15 litres per load or less

ADDITIONAL ECOBROOKS' REBATES

1) Receive a one-time \$25 rebate per utility account for the purchase of a **rain barrel** from a local retailer.

2) Receive a one-time \$25 rebate per utility account for the purchase of a **composter** from a local retailer.

*Same procedure applies as the indoor water rebates.
